

Feedback Regarding LDDF Bids 2009/10 & 2010/11

- Projects/posts should be mainstreamed if they have 'proved their worth' by meeting all the expected outcomes over a considerable period of time, particularly if they are critical to service delivery and risk management
- Identified duplication of work in some of the bids
- Requests have been made to be able to support certain aspects of a bid rather than having to support the bid in its entirety if there are areas you disagree with
- It is felt unfair that people have to bid for their own posts
- Some of the projects were considered not to be cost effective
